# Gap Inc. Early Talent Programs

## WHAT WE'RE MADE OF

We're more than the clothes we make. We're a family of **brands** uniting thousands of people across the globe who bring their personalities, **passions** and pride to work every single day. More than anything else, we're here to create **products** that make our **customers** and employees feel great, and to give back to the **communities** where we live and work.

Over the last 50 years, the company has grown from a single store into a global fashion business with seven brands: **Gap** brand, **Banana Republic**, **Old Navy** and **Athleta**. Our clothes are available online and at more than 3,500 stores in more than 90 countries. We employ over 135,000 employees, including 10,000 at our corporate headquarters locations.

## OUR VALUES

Don and Doris Fisher opened the first Gap store in 1969 with a simple idea — to make it easier to find a pair of jeans — and a commitment to do more.

We are guided by the belief that business can and should be a force for good. We know that our business succeeds when everyone is given a chance to thrive.

### Diversity + Inclusion

From championing gender equality to expanding diverse hiring programs and promoting equal rights and fair treatment around the world, we believe inclusion and opportunity are key to driving growth. In April 2019, Banana Republic launched True Hues, an inclusive line of nude necessities including camis, underwear and heels for every skin tone. In August 2021, Old Navy launched BODEQUALITY, an inclusive push to provide all styles, in extended sizes, at the same price.

### Equal Pay

Equality is woven into the fabric of our culture because it's the way the world should work. We are proud to be the first Fortune 500 company to announce equal pay for equal work.

### Sustainability

We believe that environmental issues are human rights issues. That's why we're integrating sustainability even deeper into each of our business practices, and are committed to reaching 100% renewable energy across our facilities by 2030. In early 2020, we achieved the goal we set in 2018 to conserve 10 billion liters of water by the end of 2020 through sustainable manufacturing practices.
